I GIRN NEWS

II MEMBERS AND PARTNERS INTRODUCTION

III FEATURED ARTICLE

WELCOME !

Hello dear fellow Members and Partners,

I hope you are all doing well.

Currently, we are in insane times all over the world, so we appreciate the positive thoughts we have in connection to our very soon upcoming 2nd AGM.

Our planning is in the final stages and the registration deadlines have passed.

We will very soon be providing you with your credentials to vote for your online meetings via our Mojo software.

Please remember, the sooner you start voting for your 1-2-1 meetings, the more opportunities you will have.

PS. If you haven't registered yet and still want to participate, I kindly ask you to do so this week.

After that we will not be able to register any more due to the organization and bookings. Thank you for your understanding.

Until then, I remain with warmest greetings and in joyful anticipation of finally seeing you again in September,

Josefine Draxdorf

Network Manager
Global Industrial Relocation Network

AGENDA

GIRNetwork
2nd ANNUAL MEETING
7 - 9th SEPT. | 2023
BUDAPEST

DAY ONE

07.09.2023

17:00 Standing Reception at Radisson Blu

"Enjoy a historical atmosphere with modern comfort"
Built in 1915, the elegant, traditional exterior of the Radisson Blu Béke Hotel blends well with the Pest skyline, while the modern interior is a contemporary touch.

19:00 Welcoming Dinner at Radisson Blu

Enjoy your first night of the Annual Meeting with international dinner and delicious Hungarian cuisine of our selection, along with live music.

For more information, please contact us anytime at: info@girnetwork.com

GIRNetwork
2nd ANNUAL MEETING
7 - 9th SEPT. | 2023
BUDAPEST

DAY TWO

08.09.2023

09:00 - 11:00 Introduction and Speeches
11:00 - 11:40 Group Photo & Coffee break
11:40 - 13:00 One-2-One Meetings
13:00 - 14:00 Lunch
14:00 - 17:00 One-2-One Meetings & Coffee break
18:00 Departure from hotel with busses
18:30 - 19:30 Visit Buda Castle by bus

Discover the main attractions in the Buda Castle with the official electric bus service. We can reach in comfort and discover the protected inner zone - on vehicles that do not amortize and soil the centuries-old streets.

20:00 Dinner at Bärkert

After a long day of one2one meeting, we will have a nice dinner at Bärkert. Bärkert is traditional, yet modern, passionate about premium gastronomy, bar culture, quality ingredients and art.

For more information, please contact us anytime at: info@girnetwork.com

KGE Global Logistics

KGE Global Logistics has its focus on multimodal carriage, Oil / Gas industry, Mining, agricultural, and Industrial sector, worldwide Containers shipments LCL&FCL, heavy and abnormal project cargoes.

Photo credit: KGE Global Logistics

Their Team is specialized in door-to-door delivery from any origin around the world, to Russia or any Central Asian countries up to Afghanistan, the Caucasus or Mongolia. They provide multimodal services and they focus on project movements.

They have partnerships with about 250 agents in 56 countries and regions, so they cover the whole world.

Their Service:

- Road Transport
- Sea freight Transport
- Air freight Transport
- Rail Transport
- Renewable energy projects
- Projects Logistics / Multimodal Transport

Hilco Industrial Acquisitions

As a Hilco Global company, Hilco Industrial is uniquely able to offer a simple, strategic option to their clients: asset acquisition.

A full complement of Acquisition, Disposition and Refinance solutions. With the experience of their seasoned associates, their well-established network of buyers, and the financial backing of the Hilco Global organization.

Photo credit: Hilco Industrial Acquisitions

Hilco Industrial is the only Machinery & Equipment asset disposition company that can offer this straight-forward alternative, simplifying the monetization process for the client and guaranteeing a positive result up front.

SERVICE

Asset Acquisition:

They will take the time to study your asset mix and structure a detailed offering. Working with the other Hilco Global companies, they also often develop a strategy and an "all-inclusive" package for assets other than Machinery and Equipment such as Real Estate, Inventory, WIP, Accounts Receivable and Intellectual Property.

These complex situations are where Hilco offers value above all of their competitors. Of course, Hilco will gladly work under the compensation arrangement that best suits the circumstances. In fact, they often structure arrangements involving aspects of several options.

GM Engineering

G M Engineering (NW) Ltd can operate outside standard working hours and can accommodate night and shift working as well as weekends; this allows engineering installation that suits the requirements of every client.

Photo credit: GM Engineering

Since 2014 they have worked with OEMs across the globe requiring professional services to minimise the cost and also any associated inconvenience linked to the installation required for the customer, either working directly for the OEM or directly with the end client requiring the installation and commissioning.

In short, they make light work of a potentially stressful and time consuming requirement and enable their customers to leave the installation challenges to them, allowing them to continue to trade successfully and profitably at the same time. Based in Ellesmere, they work all across the UK.

Techno Team Group

With a crew of more than 160 technicians of various specialities, from highly skilled team leaders to mechanical fitters, electricians, pipe fitters, logistic operatives and welders, they've installed, relocated and removed a tremendous number of various industrial machineries.

Photo credit: Techno Team Group

Their direct experience in this sector means millions of hours spent in factories, dedicated to production lines installation or repositioning of the machines, in order to optimize the production flows and speed up the fabrication.

Today, they are a team with extended specialities and skills, well organized and competitive, with a huge experience in almost all industries: automotive, rubber, tyres, automotive electronics, petrochemical, food, plastic injection and moulding, steel and aluminium parts manufacturing, electrical cables production, and not only.

Long time ago, Techno Team Group understood that every project is unique and their approach should be driven by care, interest, results oriented, performance, and professionalism.

Their services:

- Industrial Installation Services
- Industrial Relocation Services
- Transport Services
- Packaging

Wilh. Loesch Singapore

Wilh. Loesch is a company that started its business in Germany and is in operations since 1884.

Present in the Indian sub-continent since 2000 with global offices in Singapore, India, Bangladesh, Nepal, Germany, Kenya, Vietnam etc., Wilh. Loesch has vast experience in dismantling and relocation of mid and large-size plants as well as machinery on a global basis. The group also offers project services to setup brownfield plants in India, Bangladesh, Nepal & Vietnam.

Photo credit: Wilh. Loesch Singapore

DECARBONIZING THE HARD-TO-ABATE FREIGHT SECTOR WITH CARBON INSETTING

You can read the full article [HERE](#)

A growing number of companies are adopting the use of carbon insetting, as part of their broader roadmap to decarbonize their operations.

Photo credit: Canva

When it comes to drawing up sustainability strategies, players in the freight sector face an uphill challenge. *“Of the six ‘hard-to-abate sectors’ for decarbonization, three revolve around freight transportation – shipping, trucking and aviation. Along with the likes of heavy industry such as cement, steel, and chemicals, freight transportation typically lacks the technological mitigation options needed to enable a smooth pathway to net zero.”*

At the core is a large and complex supply chain with sometimes up to thousands of suppliers, meaning realising improvements can be difficult and requires alignment across the value chain.

But with the stakes so high – the Energy Transitions Commission estimates that six hard-to-abate sectors account for 30% of total global CO2 emissions.

The well-known, but also criticized approach of carbon offsetting, is one such strategy. In this approach, companies purchase carbon credits from a project that reduces greenhouse gas emissions to compensate their overall carbon footprint. The classic example: a polluting company plants a forest full of trees. “Here, it’s all about compensating for emissions, instead of actually reducing emissions.”

Photo credit: Canva

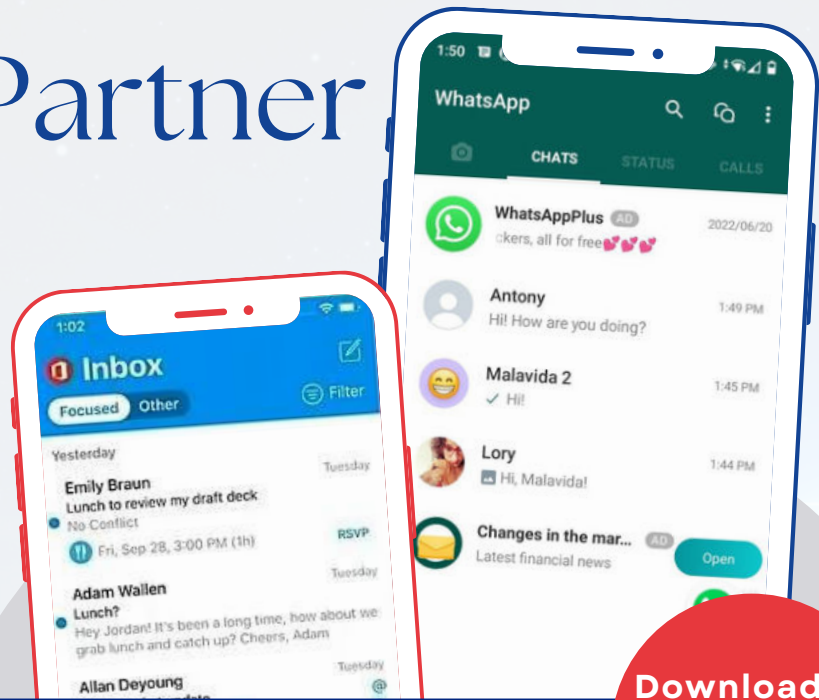

Critics have been quick to label carbon offsetting as ‘greenwashing’, with the renowned Science Based Target initiative (SBTi) going a long distance in curbing the benefits companies can claim from this approach.
