FEATURED ARTICLE

WELCOME !

Dear Members and Partners,

please allow me to start with another heartfelt thank you for the unforgettable time we spent together in Budapest.

We were very touched by your entirely positive feedback by hoping all the more that you will continue to revive the personal contacts you have made and that you will keep in regular contact to communicate about joint projects.

If we can support you here, please don't hesitate and always let us know at any time.

At the same time I would also like to take this opportunity to thank you for your patience with regard to new information on our upcoming 3rd Annual Meeting next year. Since our own demands to gather as many participants as possible in one place are very high, we unfortunately have to keep you waiting a little longer.

Furthermore I would also like to say another and last big thank you for your participation in voting on our questions about the further GERN development, be it ideas for the AGM, possible online meetings or the Whats-App-Group. We would like to assure you that we can only grow and support you through your feedback, which is why we evaluate every opinion.

So, as this will be our last issue for this year, it only remains for me to wish you a great pre-Christmas time with your loved ones. Have a good time during this very special and cozy time of year.

With my warmest regards,

Josefine Draxdorf

Network Manager

**OUR VIDEOS ARE
ALSO ONLINE**

Hello dear Members,

in between the current successful meetings with partners from our industrial sector, which have just been intensified after returning from the 2nd Annual Meeting of the Global Industrial Relocation Network in Budapest, I would like to share a few impressions hereby from this specifically mentioned meeting by means of an interview video.

As the CEO of GIRN with years of experience in the field of industrial dismantling and industrial reassembly through my own company Pol-Inowex, I was even more surprised to learn something even more during this AGM.

I am therefore looking forward to meeting you all very soon, at the latest for our 3rd edition next year, with regard to fruitful large-scale projects.

Bartosz Swiderek

MEMBERS AND PARTNERS INTRODUCTION

Global Logistics Projects
HORESZ L Hungary
RvRsupport

Global Logistics Projects

Global Logistics Projects is the company for complex transport solutions. As pioneers in worldwide project logistics they operate between tradition and innovation.

Brands said they would move manufacturing out
of China but the reality is more complicated

BRANDS SAID THEY WOULD MOVE MANUFACTURING OUT OF CHINA, BUT THE REALITY IS MORE COMPLICATED

You can read the full article [HERE](#)

In the years since the pandemic first rocked global supply chains, retailers have rushed to reduce their reliance on certain countries for manufacturing.

In early 2020, that country was China, a major hub behind most of the world's goods. Two years before the pandemic, China accounted for 28% of the global manufacturing output, and when its factories shut down due to Covid-19, companies scrambled to move manufacturing elsewhere.

Many looked to Vietnam, but in 2021, Vietnam paused much of its manufacturing due to high Covid-19 cases and low vaccination rates — leaving companies like Nike and Under Armour in the lurch. Then, in 2022, companies looked to diversify away from China again because of the country's strict zero-Covid policy.

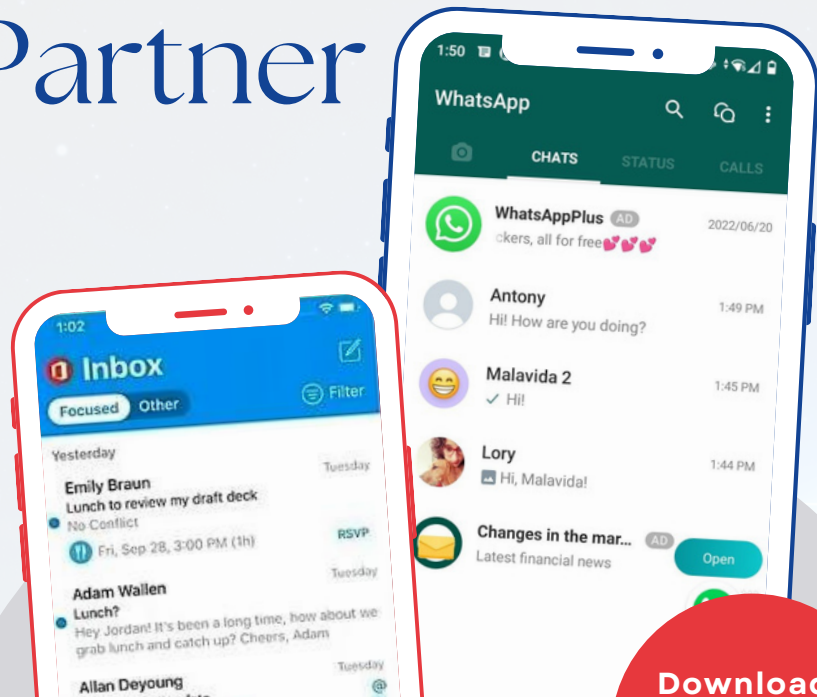

Today, more companies are setting up factories in other markets that are not China. Apple's biggest supplier Foxconn, for instance, will start manufacturing iPhones in India next year. Business-to-business startups like Zetwerk are increasingly sourcing materials from India, as well.

Nike, Adidas and Samsung have all increased operations in Vietnam, and companies that produce solar panels are moving their production to Thailand. Malaysia, Bangladesh, Cambodia and the Philippines are also proving popular among apparel companies like Gap, Inc.

At the same time, China is still a huge player in manufacturing, and it's proven tough for businesses to pull out of the country completely.
